DETAILED ACTION

Allowable Subject Matter

1. Claims 1-71 are allowed.
2. The following is an examiner's statement of reasons for allowance: This invention deals with an elongated sleeve structure comprising a common seamless edge and a second edge, wherein the opposed layers are joined along the second edge by a knit stitch formed by interloping of successive traverses of the fill yarn (claim 1). This invention also deals with an elongated sleeve comprising opposing portions of a sidewall being in facing relation with one another to assume a flat configuration, wherein sidewall portions are separable into spaced apart relation (claim 32). This invention also deals with a sleeve comprising an attachment piece extending through each of said sidewalls and attaching said sleeves to one another in overlying relation (claim 55). This invention also deal with a method of positioning and protecting an elongated sleeve comprising the steps of drawing a line through said duct; attaching one end of said line to said attachment device, drawing said sleeve through said duct using said line; severing said sleeve to remove said attachment device', attaching said elongated item to one end of said pull tape; and drawing said elongated item through said sleeve using said pull tape (claim 70). The above stated claim limitations, in combination with other claim limitations is not taught or suggested by the prior art of record..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed February 6, 2006 have been fully considered and they are persuasive. Specifically, the applicant argument that "none of the prior art cited teaches an elongated sleeve structure comprising a common seamless edge and a second edge, wherein the opposed layers are joined along the second edge by a knit stitch formed by interloping of successive traverses of the fill yarn, nor an elongated sleeve comprising opposing portions of a sidewall being in facing relation with one another to assume a flat configuration, wherein sidewall portions are separable into spaced apart relation " are persuasive and therefore the claims have been allowed.
